

The background of the slide is a photograph of a modern office interior. It features a large wooden conference table with several red chairs. The room has large windows on the left and right, offering a view of greenery outside. The ceiling is exposed concrete with visible pipes and modern pendant lights. A television is mounted on the back wall.

Acme Gatekeeper

Governance and policy infrastructure for production AI

Fast-growing companies adopt AI faster than they can govern it

A fifty-person engineering team might now connect eight model providers across product, support, and internal tools - with zero unified audit trail, unpredictable monthly token invoices, and no automated compliance checks.

What that costs them

Customer audit failures when
enterprise clients ask

Surprise token spikes
discovered only at billing

Fragmented policies written in
ad-hoc prompt code

Unchecked PII and secret
leaks across shadow tools

A single deterministic gateway in front of every model

Every outbound LLM call passes through Acme before reaching upstream providers. **Policies** evaluate through Open Policy Agent (OPA), keeping rules declarative, version-controlled, and testable in CI/CD.

Zero changes to existing application code: swap one base URL in your client configuration and enforce policy on day one.

ACME.

How Acme protects your workload

Enforce

OPA inspects and validates requests before egress

Record

Immutable event stream of prompt hashes, latency, and tokens

Redact

Real-time PII masking and secret prevention at the wire

Comply

Instant audit packages for EU AI Act, SOC 2, and GDPR

Operating with & without Acme

Today

AUDIT TRAIL

Ad-hoc log queries

COST ALLOCATION

Aggregate month-end bill

POLICY ENFORCEMENT

Confluence guidelines

PROVIDER ONBOARDING

Weeks of security review

DATA RESIDENCY

Unknown routing

With Acme

AUDIT TRAIL

Signed event stream (7 yrs)

COST ALLOCATION

Per-team attribution, live

POLICY ENFORCEMENT

Declarative OPA bundles

PROVIDER ONBOARDING

15-minute credential update

DATA RESIDENCY

Guaranteed EU-only egress

When our enterprise bank clients asked for our AI data governance records, we delivered verified OPA enforcement logs in under an hour. Acme turned a potential sales blocker into our strongest trust proof.

VP of Engineering, Series B Fintech (Stockholm)

Product roadmap

Q1

Turnkey OPA policy
bundles for EU AI Act
Article 12 compliance

Q2

Real-time semantic budget
limits and anomalous
spend throttling

Q3

Air-gapped on-premise
appliances and self-hosted
VPC agents

Q4

Native zero-trust egress
connectors for sovereign
European LLMs

Transparent, usage-based pricing

Tier	Workspaces	Monthly Requests	Retention & Compliance	Price
Team	3	Up to 500k reqs	90-day signed logs	490 € / mo
Business	10	Up to 5M reqs	2-year audit vault	1 450 € / mo
Enterprise	Unlimited	Custom volume	7-year vault + VPC	Custom

Built by infrastructure engineers

Founded by former payment security and distributed systems leads from Pay More Inc and Bank of Tor. We built Acme after managing compliance across 40+ LLM services internally. Today, Acme governs production traffic across 18 European tech companies.
